Gesture Drawing

Gesture drawing is a great way to capture the overall movement and energy of a figure. When you gesture draw, you are not trying to draw every detail of the figure; instead, you are trying to capture the overall flow and rhythm of the pose. This can be a very helpful way to get started with a figure drawing, and it can also be a lot of fun.

Blocking In the Figure

Once you have a good understanding of anatomy and gesture drawing, you can start to block in the figure. This involves drawing the basic shapes of the body, such as the head, torso, and limbs. You can use simple geometric shapes to start with, and then gradually refine your drawing as you add more details.

Adding Details

Once you have the basic shapes of the figure blocked in, you can start to add details. This includes drawing the facial features, hair, clothing, and other details. When you add details, it is important to be selective and only

include the details that are necessary to convey the overall impression of the figure.

Shading and Lighting

Shading and lighting are essential for creating realistic figure drawings. Shading can help you to create the illusion of depth and volume, and it can also be used to convey the mood and atmosphere of a scene. In this section, we will discuss the different techniques of shading and lighting, and we will provide you with tips on how to use these techniques to create effective figure drawings.

In this section, we will discuss the different techniques of perspective, and we will provide you with tips on how to use these techniques to create effective figure drawings.
