

Theory, Algorithms and Applications: Chapman Hall/CRC Machine Learning & Pattern Recognition

Theory, Algorithms and Applications: Chapman Hall/CRC Machine Learning & Pattern Recognition provides a comprehensive and in-depth analysis of theoretical foundations and practical applications of machine learning and pattern recognition. Authored by leading experts in the field, this authoritative reference work covers a wide range of topics, including supervised learning, unsupervised learning, dimensionality reduction, feature selection, and neural networks.

Sparse Modeling: Theory, Algorithms, and Applications (Chapman & Hall/Crc Machine Learning & Pattern Recognition) by Irina Rish

★★★★★ 5 out of 5

Language : English

File size : 22890 KB

Screen Reader : Supported

Print length : 253 pages

Theory, Algorithms and Applications: Chapman Hall/CRC Machine Learning & Pattern Recognition is an essential resource for researchers, practitioners, and students in the fields of machine learning, pattern recognition, and related areas.

Key Features

- Provides a comprehensive and in-depth analysis of theoretical foundations and practical applications of machine learning and pattern recognition
- Authored by leading experts in the field
- Covers a wide range of topics, including supervised learning, unsupervised learning, dimensionality reduction, feature selection, and neural networks
- Essential resource for researchers, practitioners, and students in the fields of machine learning, pattern recognition, and related areas

Table of Contents

- 1.
2. Supervised Learning
3. Unsupervised Learning
4. Dimensionality Reduction
5. Feature Selection
6. Neural Networks
7. Applications

Reviews

"Theory, Algorithms and Applications: Chapman Hall/CRC Machine Learning & Pattern Recognition is a comprehensive and in-depth analysis of theoretical foundations and practical applications of machine learning and pattern recognition. Authored by leading experts in the field, this

authoritative reference work covers a wide range of topics, including supervised learning, unsupervised learning, dimensionality reduction, feature selection, and neural networks. Theory, Algorithms and Applications: Chapman Hall/CRC Machine Learning & Pattern Recognition is an essential resource for researchers, practitioners, and students in the fields of machine learning, pattern recognition, and related areas."

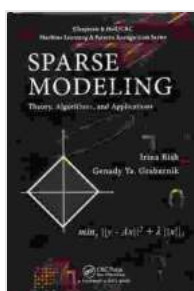

- Professor Jiawei Han, University of Illinois at Urbana-Champaign

"Theory, Algorithms and Applications: Chapman Hall/CRC Machine Learning & Pattern Recognition is a must-have reference for anyone working in the field of machine learning or pattern recognition. This authoritative volume provides a comprehensive overview of the theoretical foundations and practical applications of these rapidly evolving fields. I highly recommend it to researchers, practitioners, and students alike."

- Professor Christopher Bishop, University of Cambridge
